Education

Mumbai University   **Dec. 2021 – May 2025**
Bachelor of Engineering in Information Technology   *Bandra, Maharashtra*

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Database Management
- Operating System
- Computer Networks

Experiences

Full Stack Developer Internship - Suvidha Foundation   **28, January 2025 - present**

- Building a Job Portal web application, for Job Seeker as well as Employers to post new jobs.
- Implemented Authentication mechanism, at frontend added privateRoutes and at backend used JWT-token to generate tokens for verified user only
- Used LocalStorage of browser to improve the computation in database, (for e.g. checking whether user has applied for a job or not)
- At backend, wrote proper end points for all routes using ExpressJS, NodeJS

Courses

Fullstack Developement Course - GeeksForGeeks   **August 2024 – October 2024**

- * Implemented the Advanced concepts of Git and Github, CSS, ReactJs.
- * Skilled to write optimized codes which helps to limit the server calls.
- * In the hands on Live Sessions cleared all my doubts related to ReactJS working, Async JS working.

Advanced JavaScript   **July 2024 – August 2024**

- * With the help of this course I prepared for the Machine Coding Round.
- * Get the strong hold on Asynchronous JavaScript

Projects

E-Commerce | *ReactJS, J.W.T, Tailwind CSS*   **September 2024**
- * Developed an E-commerce website which has all similar functionalities of similar E-commerce websites
- * Demonstrated the checkout section, created Private Routes for cart, wishlist to provide confidentiality and integrity. So, that only authenticated users can view and update.
- * Used fakestoreapi to demonstrate all the RestFull operations (CRUD)
- * Using JWT token demonstrated the user login.

Task Manager | *React, Tailwind, LocalStorage*   **September 2024**
- * Created a task manager application, which demonstrate all the CRUD operations.
- * Routing functionality added to move between different tabs.
- * Created the global states using useContext hook, managed different states of handling tasks using useReducer hook

Instagram Clone | *ReactJs, Firebase, Zustand, Chakra UI*   **January 2024**
- * Created an Instagram Clone supports similar functionalities of sharing posts between friends
- * Zustand a centralized state management library used to manage actions.
- * It is a full-fledged instagram clone with authentication, signup with google account, can share posts to friends and see their posts, show their reactions on their posts.

Technical Skills

Languages: Python, HTML/CSS, JavaScript, SQL
Technologies/Frameworks: Linux, Jenkins, GitHub, ReactJS, MongoDB, Git

Extracurricular

Problem Solving

- * More than 560 problems solved on geeksforgeeks
- * More than 270 coding problems solved on leetcode
- * More than 200 coding problems solved on codeforces
